

cycle

Bins

main features

The bicycle storage bin offers an elegant solution for the storage of cycles in places where the traditional storage methods detracts from the architecture of the building.

- Unique advanced design
- Ideal solution for areas short on space
- A single bin requires the space of one standard parking bay.
- Single bins can be attached to each other to create multiple bins
- A small four bike version is also available
- Secure cost effective cycle storage
- Easy installation

product colour description

Aluminium components:

Can be finished in a wide range of RAL colours.

Synthetic Trespa Sidewalls:

Can be supplied in a wide range of RAL colours
A Trespa colourfan can be viewed upon request.

cycle

Bins

technical information

Main components: Aluminium.

Sidewalls: Made of 6mm thick Trespa synthetic panels and the synthetic glazing are made of 4mm clear acrylic resin.

Lid: Easy to open and close due to a balance spring that is fixed to it.

Lock: Cylinder lock supplied with five keys.

Cycle stand: Bin supplied with a cycle stand for five bicycles (small bin stores four bikes), stored at 35cm centre to centre.

Where space is restricted, a 30cm smaller version is available which holds four cycles. This allows, for example, the bin to fit into one car parking space.

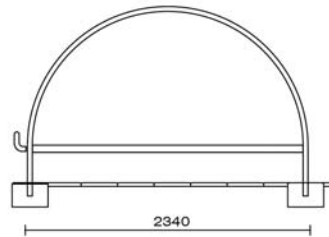

measurements

Standard bike bin:

Length: 2140mm

Depth: 2340mm

Height: 1450mm

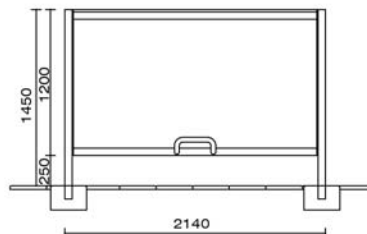

Compact bike bin:

Length: 1840mm

Depth: 2340mm

Height: 1450mm
